

## Stofflage- und Zuschneidepläne für Trinity selbst erstellen:

Da Trinity viele Optionen und Längen anbietet, ist es fast unmöglich für euch praktikable Verbrauchsangaben zu machen.

Hier gebe ich euch eine Möglichkeit, eure individuellen Zuschneidepläne und Stoffverbräuche selbst zu ermitteln.

Ihr findet für jede Größe alle benötigten Schnittteile inklusive Nahtzugabe und Säume maßstabsgerecht vor. (10 % der Originalgröße).

Die Stoff-Vorlagen geben euch einmal die Option in Einzellage, also komplett ausgebreitet und einmal doubliert zu legen.

Als Vorgabe findet ihr Stoffbreite 1,50 m (hellerer Rand) und Stoffbreite 1,40 m Mit der eingezeichneten Mess-Skala und Linien in je 10 cm Abstand könnt ihr den Verbrauch einfach ermitteln.

Ihr druckt euch die Seiten für eure Größe + die Stoff-Vorlage zum Legen eures Modells aus. Dann schneidet eure benötigten Schnittteile in der gewünschten Länge und legt sie auf die Stoffvorlage.

Alternativ könnt ihr euch den **Stofflegeplan in Inkscape** erstellen und ausdrucken. Wie das funktioniert, erkläre ich euch in einem Video auf meinem Youtube Kanal.

Am besten macht ihr euch dann mit eurem Handy ein Foto vom fertigen Stofflegeplan.

**Auf der nächsten Seite findet ihr Beispiele, wie es aussehen könnte:  
Bei einer Stoffbreite von 1,40 m**
